BEST AVAILABLE IMAGES

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images include but are not limited to the items checked:

- ☐ BLACK BORDERS
- ☐ IMAGE CUT OFF AT TOP, BOTTOM OR SIDES
- ☐ FADED TEXT OR DRAWING
- ☐ BLURRED OR ILLEGIBLE TEXT OR DRAWING
- ☐ SKEWED/SLANTED IMAGES
- ☐ COLOR OR BLACK AND WHITE PHOTOGRAPHS
- ☐ GRAY SCALE DOCUMENTS
- ☐ LINES OR MARKS ON ORIGINAL DOCUMENT
- ☒ REFERENCE(S) OR EXHIBIT(S) SUBMITTED ARE POOR QUALITY
- ☐ OTHER: _____

IMAGES ARE BEST AVAILABLE COPY.

As rescanning these documents will not correct the image problems checked, please do not report these problems to the IFW Image Problem Mailbox.

Appln. No. 09/696,114
Amendment dated August 13, 2004
Reply to Office Action of May 19, 2004

Amendments to the Claims:

Please amend claims 124, 142, 144, 147, 148 and 150 as follows. The following listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

Claims 1-123 (Cancelled).

Claim 124 (Currently Amended). A book copying system for copying a book based on electronic image data obtained through a network, comprising:

5 a data service system connected to the network and to supply electronic image data of a book through the network, the data service system having a data storage section in which image data of a plurality of different books are stored and a data managing section to manage the image data;

10 a print service station connected to the network and installed at a place where ~~the print service station provides print service for a customer~~ a user operates a print section to make a print of a document and the user operates an input section to input a print order of the user to print a copy of an ordered

Appln. No. 09/696,114
Amendment dated August 13, 2004
Reply to Office Action of May 19, 2004

book, the print service station having the input device, a print
15 ~~managing section to input a print order of a customer to print a~~
~~copy of an ordered book and~~ to communicate with the data service
system so as to obtain image data of the ordered book from the
data storage section through the network and ~~a~~ the print section
to print a copy of the ordered book based on the obtained image
20 data;

wherein the print service station selectively sets a
printing condition in accordance with the print order and sets
the print service charge in accordance with the selected printing
condition,

25 wherein after the print service station prints the image
data, the print service station determines the print service
charge in accordance with a print result of the copy of the
ordered book, and

wherein the data service system sets a data service charge
30 for the image data of the ordered book, and

a calculating section connected to the network to receive
the data service charge and the print service charge and to
calculate a copy charge based on the data service charge and the
print service charge and to conduct a payment process for the
35 ~~customer~~ user in accordance with the calculated copy charge.

Appln. No. 09/696,114
Amendment dated August 13, 2004
Reply to Office Action of May 19, 2004

Claim 125 (Cancelled).

Claim 126 (Previously Presented). The book copying system of claim 124, wherein the print service station reports a print result of the copy to the calculating section and the calculating section reduces the copy charge in accordance with the printing
5 result of the copy.

Claim 127 (Previously Presented). The book copying system of claim 126, wherein the print service station comprises a copy result detecting section which reports the printing result.

Claim 128 (Previously Presented). The book copying system of claim 126, wherein the printing result includes a notice to indicate successful printing.

Claim 129 (Cancelled).

Claim 130 (Previously Presented). The book copying system of claim 124, wherein when the calculating section is provided in the print service station, the data service system transmits the

Appln. No. 09/696,114
Amendment dated August 13, 2004
Reply to Office Action of May 19, 2004

data service charge through the network to the print service
5 station so that the calculating section calculates the copy
charge.

Claim 131 (Previously Presented). The book copying system
of claim 124, wherein when the calculating section is provided in
the data service system, the print service station transmits the
print service charge through the network to the data service
5 system so that the calculating section calculates the copy
charge.

Claim 132 (Previously Presented). The book copying system
of claim 131, wherein after the print service station prints the
copy, the print service station transmits the print service
charge through the network to the data service system so that the
5 calculating section calculates the copy charge.

Claim 133 (Previously Presented). The book copying system
of claim 124, wherein the data service system sets the data
service charge based on at least one of a royalty of a copyright
on the book, a data conversion fee to convert an original book

Appln. No. 09/696,114
Amendment dated August 13, 2004
Reply to Office Action of May 19, 2004

5 into electronic image data and a service charge to transmit the image data.

Claim 134 (Previously Presented). The book copying system of claim 133, wherein when the copyright on the ordered book is terminated, the data service system excludes the royalty of the copyright from the data service charge.

Claim 135 (Previously Presented). The book copying system of claim 124, wherein the print service station sets the print service charge based on at least one of a rental fee for materials and a rental fee for a printer which is used for
5 printing the image data.

Claim 136 (Previously Presented). The book copying system of claim 135, wherein before the print service station prints the image data, the print service station estimates the copy service charge based on at least one of the rental fee for the materials
5 and the rental fee for the printer which are expected to be used for printing the image data.

Claim 137 (Previously Presented). The book copying system of claim 135, wherein after the print service station printed the

Appln. No. 09/696,114
Amendment dated August 13, 2004
Reply to Office Action of May 19, 2004

image data, the print service station sets the copy service charge based on at least one of the rental fee for the materials and the rental fee for the printer which were used for printing the image data.

Claim 138 (Cancelled).

Claim 139 (Previously Presented). The book copying system of claim 135, wherein the print service station comprises a plurality of printers and sets the print service charge for each of the plurality of printers.

Claim 140 (Previously Presented). The book copying system of claim 124, wherein at least one of the data service charge and the print service charge is encrypted.

Claim 141 (Previously Presented). The book copying system of claim 140, wherein at least one of the data service charge and the print service charge is provided with a digital signature encrypted with a cryptography key.

Appln. No. 09/696,114
Amendment dated August 13, 2004
Reply to Office Action of May 19, 2004

Claim 142 (Currently Amended). A The book copying system of
claim 124, ~~for copying a book based on electronic image data~~
~~obtained through a network, comprising:~~

~~a data service system connected to the network which~~
5 ~~supplies electronic image data of a book through the network, the~~
~~data service system having a data storage section in which image~~
~~data of a plurality of different books are stored and a data~~
~~managing section to manage the image data,~~

~~a print service station connected to the network and~~
10 ~~installed at a place where the print service station provides~~
~~print service for a customer, the print service station having a~~
~~print managing section to input a print specification of a~~
~~customer to print an ordered book and to communicate the data~~
~~managing section so as to obtain image data of the ordered book~~
15 ~~from the data storage section through the network and a print~~
~~section to print a copy of the ordered book based on the image~~
~~data,~~

wherein at least one of the data service system and the
print service station comprises a data processing section to
20 compile the image data in accordance with the print specification
of the customer user, the print service station controls a
printing condition to print the compiled image data by the print
section in accordance with the print specification,

Appln. No. 09/696,114
Amendment dated August 13, 2004
Reply to Office Action of May 19, 2004

wherein the print service station sets an estimated copy
25 charge in accordance with the print specification and indicates
the estimated copy charge for the ~~customer~~ user, and

wherein when the ~~customer~~ user agrees to the estimated ~~the~~
copy charge, the print service station sends an order signal to
the data service system, ~~and~~

30 ~~a calculating section to calculate a copy charge based on~~
~~the estimated copy charge and to conduct a payment charging~~
~~process for the customer in accordance with the calculated copy~~
~~charge.~~

Claim 143 (Cancelled).

Claim 144 (Currently Amended). The book copying system of
claim 142, wherein the data service system transmits an estimated
data service charge for the image data of the ordered book to the
print service station and the print service station sets the
5 estimated copy charge based on the estimated data service charge.

Claim 145 (Previously Presented). The book copying system
of claim 144, wherein the data service system transmits the
estimated data service charge together with a period of validity

Appln. No. 09/696,114
Amendment dated August 13, 2004
Reply to Office Action of May 19, 2004

and when the period of validity has expired, the data service
5 system makes the estimated data service charge invalid.

Claim 146 (Cancelled).

Claim 147 (Currently Amended). The book copying system of
claim 142, wherein the data service system transmits job ID
information to the print service station and the data storage
section.

Claim 148 (Currently Amended). The book copying system of
claim 147, wherein when the ~~customer~~ user agrees to an estimated
copy charge and sends an order signal, the data service system
transmits job ID information to the print service station.

Claim 149 (Previously Presented). . The book copying system
of claim 147, wherein the data storage section specifies image
data and the print service station to be sent the image data on
the basis of the job ID information.

Claim 150 (Currently Amended). The book copying system of
claim 149, wherein the data storage section collates the job ID
information sent to the print service station with the job ID

Appln. No. 09/696,114
Amendment dated August 13, 2004
Reply to Office Action of May 19, 2004

information transmitted from the data managing section and
5 specifies the print service station having the same job ID
information to which the image data will be sent.

Claim 151 (Previously Presented). The book copying system
of claim 149, wherein the data storage section forwards the job
ID information sent to the print service station to the data
managing section and the data managing section collates the job
5 ID information with the job ID information forwarded from the
data storage section and specifies the print service station to
which the image data will be sent.

Claim 152 (Previously Presented). The book copying system
of claim 151, wherein the data managing section transmits a data
storing location to the print service station in response to the
order signal.

Claim 153 (Previously Presented). The book copying system
of claim 152, wherein the print service station accesses the data
storage section on the basis of the obtained data storing
location and sends the print specification to the data storage
5 section.

Appln. No. 09/696,114
Amendment dated August 13, 2004
Reply to Office Action of May 19, 2004

Claim 154 (Previously Presented). The book copying system of claim 153, wherein the data storage section includes the data processing section which compiles the image data on the basis of the print specification.

Claim 155 (Previously Presented). The book copying system of claim 153, wherein the print specification includes a print mode and the data processing section compiles a page arrangement in accordance with the print mode.

Claim 156 (Previously Presented). The book copying system of claim 155, wherein the print mode includes a page-unit print and a book-unit print.

Claim 157 (Previously Presented). The book copying system of claim 153, wherein the data storage section encrypts the image data and the print service station decrypts the encrypted data and conducts the printing on the basis of the decrypted data.

Claim 158 (Previously Presented). The book copying system of claim 157, wherein the print service station conducts a trial printing before the printing.

Appln. No. 09/696,114
Amendment dated August 13, 2004
Reply to Office Action of May 19, 2004

Claim 159 (Previously Presented). The book copying system of claim 153, wherein the print managing section of the print service station requests the print section to conduct the printing after obtaining the image data from the data storing
5 location.

Claim 160 (Previously Presented). The book copying system of claim 159, wherein the print service station reports a print result of the copy and the book copying system adjusts the copy charge in accordance with the printing result of the copy.

Claim 161 (Previously Presented). The book copying system of claim 160, wherein the book copying system conducts a payment charging processing on the basis of the printing result.

Claim 162 (Previously Presented). The book copying system of claim 160, wherein at least one of the estimated copy charge and the printing result is provided with a digital signature by a public key cryptograph method.

Claim 163 (Previously Presented). The book copying system of claim 142, wherein when the print service station requests a

Appln. No. 09/696.114
Amendment dated August 13, 2004
Reply to Office Action of May 19, 2004

log-in for the data service system, the data service system certifies the request of log-in of the print service station.

Claim 164 (Previously Presented). The book copying system of claim 163, wherein the print service station is provided with a cryptograph key for each client and when the print service station accesses the data service system, the print service
5 station makes a digital signature encrypted by the cryptograph key.

Claim 165 (Previously Presented). The book copying system of claim 163, wherein when the print service station accesses the service system, the print service station makes a digital signature by a public key cryptograph method.

Claim 166 (Previously Presented). The book copying system of claim 142, wherein when the calculating section is provided in the print service station, the data service system transmits the data service charge through the network to the print service
5 station so that the calculating section calculates the copy charge.

Appln. No. 09/696,114
Amendment dated August 13, 2004
Reply to Office Action of May 19, 2004

Claim 167 (Previously Presented). The book copying system of claim 142, wherein when the calculating section is provided in the data service system, the print service station transmits the print service charge through the network to the data service
5 system so that the calculating section calculates the copy charge.
